

E-Waste Disposal Assistant

AI-Powered Sustainable E-Waste Management

Upload an image of an electronic item.

The AI will:

- ✓ Identify the item
- ✓ Show confidence score
- ✓ Determine recyclability
- ✓ Classify waste category
- ✓ Suggest disposal methods
- ✓ Provide sustainability tips
- ✓ Measure environmental impact
- ✓ Support SDG 12

Detected Item

Hand-Held Computer

Recyclable?

Confidence Score

AI Confidence

45.98%

☒ Yes, Highly Recyclable

Waste Category

Mobile Phone E-Waste

Disposal Method

Submit to an authorized e-waste collection center. Remove personal data before recycling.

Sustainability Tips

- ☒ Donate working devices.
- ☒ Repair before replacing.
- ☒ Recycle batteries separately.

Environmental Impact

Smartphones contain valuable metals such as gold, silver and copper that can be recovered through recycling.

SDG Impact

SDG 12 – Responsible Consumption and Production

Sustainability Score

Sustainability Awareness Score: 45/100

About This Project

This AI-powered E-Waste Disposal Assistant helps users:

- Identify electronic waste using AI
- Learn proper disposal methods
- Promote recycling and reuse
- Reduce environmental pollution
- Support sustainable consumption

 Supported Sustainable Development Goal

SDG 12 – Responsible Consumption and Production
